

# THE RESTORATIVE MEDIATION PROJECT

The Restorative Mediation Project is a non-profit collaboration of practitioners to increase the awareness and use of Restorative Mediation in the resolution of personal injury and medical error claims. An alternative to costly, protracted litigation, this process can help both the injured and responsible party gain some measure of peace after a traumatic event.

*Are you interested in transforming the experience of people involved in personal injury and medical error cases? Are you interested in exploring the potential of healing conversations?*

*If so, please join us....*
